

Is a hotdog a sandwich?

Let's explore four different opinions on this age-old debate.

1. **The New Webster's Dictionary** says a hotdog *is* a sandwich. Why? Because it fits the definition: filling between two slices of bread or a split roll.
2. **A chef's blog post** argues otherwise. According to this perspective, a hotdog goes *beyond* the traditional sandwich, deserving its own unique category.
3. **A recent news article** claims a hotdog is *not* a sandwich. The reason? Sandwiches are typically served in a horizontal orientation, while hotdogs are vertical.
4. **A YouTube video** weighs in, saying a hotdog *is* a sandwich because of their shared historical roots.

Now it's your turn—what do you think? **Is a hotdog a sandwich?**
