

Academic Search Ultimate

Academic Search Ultimate is a great place to find articles related to any academic discipline. You can use it to search through specific databases related to your topic or you can use it to search across many different databases.

Click on the Arrow (on the right side of the slide) to continue.

Finding the Database

Steps:

1. Go to lib.byu.edu and login using your NetID and password.
2. In the main search bar type, “Academic Search Ultimate.”
3. Click on “Academic Search Ultimate” in the tan box.
4. Once in the database, find and click on “Advanced Search.”

Using Advanced Search

There are a lot of different search options and filters, but don't get overwhelmed. These are designed to help you find exactly what you are looking for.

Try narrowing your search with the built-in Boolean operators. A broad search will likely give too many results.
